A NEW ANTIDOTE FOR INTEMPERANCE. + What follows may strike the reader as an absu rdity and the coinage of a prolific brain, but the tacts can be substantiated as being true in every particular, notwithstanding the story smatters of the preposterous. For good reasons no names are mentioned in connection with the aff. ir. Several months since a gentleman who had been in the habit of returning to his home at night in an intoxicated condition suddenly ceased drinking, nor could the strongest invitations of his friends induce him to take another drop. He refused to explain why he had abandoned the cup, and it was but a few days since that he related why he ceased tippling. He said that he was possessed of a dear and good wife, and that on one occasion, after he had returned home in 2 drunken condition, his wife tied him in a blacket and administered to him a sound whipping, the instrument of castigation being a stoot stick. By this means the wife supposed to effect a cure, but the medicine proved ineffectual, and the intexication continued. Finally she hit upon an ingenious plan for reclaiming her husband, and one day while he was sober she warned him that he stood in great danger of incurring the displeasure of Heaven for his sins, and that, sooner or later, a dire affliction would overtake him. The advice was thrown aside, and one night the wife prepared a cup of glue and Olin; Hon. N. G. Ordway, Sgt. Arms, U. S two small strips of lines, and when her besotted H. of R. Washington, je 11-tf husband came home and retired to bed she skillully glued his eyes over with the sticky substance, and patiently awaited daylight for the denouement. That time came, and great was the consternation of the husband when he ascertained that he could not open his eyes. Now was the time for the wife to finish her scheme. She prefessed the greatest sorrow for her husband, reminded "Hubby" of what she had previously said concerning the wrath of Heaven, and expressed her firm belief that her husband had been struck blind. The husband groaned in spirit, and called upon his wife for help. She suggested prayer, and at last the agonized man fell upon his knees and suppli-cated the Throne of Mercy for relief. While thus engaged the wife applied warm water to the glued eyes, and finally the linen was removed and the sight restored to the now over

SEWING MACHINES. - The number of these machines made by twelve principal companies during the past year amounted to 320,669, which, at the average price of a first-class machine, say \$75, aggregated total, \$24,050,170. The first class American sewing machine is to be found in all quarters of the world, and the supply comes principally from this city and Boston. There are many cheap machines, which are sold all the way from two to twenty dollars, which are not counted in these figures. There are also many cheap imitations of the best American machines manufactured in Fig. land and on the Centinent which are sold as of American make. Germany, in particular, does a very large business of this kind, Hamburg having no less than six large factories running, and finding a market principally in Russia, with which country we have comparatively little direct trade. Notwithstanding this competition, the machines sent from this country command high prices abroad, on account of excellence in workmanship and finish, and are exported in large numbers annually. All of the largest manufacturers have agencies in the principal cities of Europe, and receive large orders from abroad by nearly every steamer .-The largest number made by any one concern in a year was 86,781. Notwithstanding the large amount of work which can be done by these ingenious contrivances, which used to be done entirely by hand, there seems to be no diminution of hand work in many branches of business. As the cost of manufacturing good sewing machines varies from \$12,50 to \$60, and the prices at which they are sold range from \$60 to \$350, the profits of the business are enormous. - New York Bulletin.

of the night had been a warning for him to

abandon the fatal cup. He kept his promise,

her husband .- Balt. American.

HISTORY OF A MISSING MEMENTO. - On the 2d of March, 1867, Congress appropriated \$5,000 for a gold medal to be presented to Cyrus W. Field upon the completion of the Atlantic cable. The medal was made of solid gold, weighing some three or four pounds. elaborately carved and mounted, and enclosed in a pearl case mounted with gold. Secretary McCulloch, who was then Secretary of the Treasury, received the medal from the mint and sent it to President Johnston by his confidential secretary. The medal was missed shortly after this, and upon inquiry being made Mr. Johnston stated he had returned it to the Treasury Department. Nothing could be heard of it at the department, and it was finally believed that the medal had been stolen. Congress therefore made an appropriation of \$5,000 for a duplicate, which was made and presented to Mr. Field about two years ago.

It now turns out that the original medal was returned to the Treasury Department by President Johnston after he had viewed it, and the messenger gave it to Assistant Treasurer Tuttle, who locked it up in his private safe, and never heard the charge that it had been stolen, or an appropriation made for a new one. The medal remained in his safe until Saturday last, when Mr. T. inquired of Gen. Spinner why Mr. Field did not come for his medal. Gen. Spinner was greatly astonished, of course, at hearing all the facts in the case, and will retain the medal until some disposition be made by Congress. It is probable that it will be placed on exhibition in the Smithsonian, as Mr. Field has already received the duplicate. - Washington Star.

SELF-WASHING SOAF. The manufacturer having purchased the right to the city and county of Alexandria, would invite the attention of the public to this fine soap, which washes effectually from the coarsest to the finest fabric, in cold, warm, hard, soft or salt water, without boiling or machinery, and is guaranteed not to injure the texture of the finest fabrib, when used in accordance with the instructions. The manufacturer hereby guarantees, in the sum of five hundred dol-lars, that this soap, used according to the directions, will prove less injurious to fabrics

than any ordinary soap used
It is a superior soap, for the following rea-1st. The soap, by its own action, dissolves the grease and liberates the dirt in the garment; hence it quietly and speedily accomplishes that which is usually done by labor and violence upon the clothes by a washing machine or wash board. Very little hand rubbing is required when this soap is used, except when the dirt has settled very tightly in the garment, or it

has been very much soiled. 2d. One good wash woman, when familiar with its use, can accomplish more and better washing with this soap in the same time than two women with two of the best machines, using the ordinary soaps in the market. 3d. The clothes require no bluing, as they are

b cached every time they are washed, if they are dried in the sun. 4th. It will wash out coach or machine grease, paint or anything that can be removed, without the slightest injury to the garments.
5th. There is no acid or sal-soda used in its

manufacture. 6th. The proprietor guarantees that there is nothing in it that can in any way injure garments, if used as directed.

7th. It has a healing effect on skin diseases, such as washing tetter, etc.

8th. Clothing washed with this soap will last

more than twice as long as with the ordinary 9th. For washing paints, cleaning house, car-pets, scouring, etc., it has no equal. 10th. By its use you save women, time, mon-

ey, labor, clothes and fuel.
11th. A first premium was awarded by the East Pennsylvania Montgomery County Agricultural and Mechanical Society, September 24th, 1869. Diploma preferred. 12th. To consumers it is the cheapest scap

manufactured. Patented March 22, 1870, by Alex. Warfield. Thousands upon thousands are now using it, and will use no other, owing to the labor and time saved in washing, and the nice finish it gives to their clothing. Again, by using this soap, the annoyance of hot water in summer is avoided, and steam in the house during the

MENTALLY - The fearful effects on the mind are much to be dreaded. Loss of memory, Confusion of Ideas, Depression of Spirits, Evil Forebodings, Aversion to Society, Self Distrust, Love of Solitude, Timidity, &c., are some of the

evils produced.
Thousands of persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pale, nervous and consented, having a singular appearance about the oyer, cough and symptoms of Consumption.

YOUNG MEN Who have injured themselves by a collain practice, already described, a habit frequently learned from evil companions or at school, the effects of which are nightly felt, even when asleep, and if not cured, represented the collaboration and destroys both pind

even when asteep, and if not cured, readers marriage impossible, and destroys both hind and body, should apply immediately.

What a pity that a young man, the hope of his country, the pride of his parents, should be snatched from all prospects and enjoyment of life by the consequence of daviating from the path of nature, and indulging in pernicious habits. Such passons must, hadore consequence of the path of th cious habits. Such persons must, before con-

templating MARRIAGE, Reflect that a sound mind and body are the most necessary requisites to promote connubi-al happiness. Indeed, without these the journey through life becomes a weary pilgrimage, the prospect hourly darkens to the view, the mind becomes shadowed with despair, and filled with the melancholy reflection that the happi-

ness of another is blighted with our own. DISEASE OF IMPRUDENCE.

When the misguided and imprudent votary of pleasure finds that he has imbibed the seeds of this psinful disease, it too often happens that an ill-timed sense of shame or dread of discovery deters him from applying to those who, from education and respectability, can alone belriend him, delaying till the constitutional symptoms of this horrid disease make their appearance, such as ulcerated sore throat diseased nose, nocturnal pains in the head and limbs, dimness of sight, deafness, nodes on the shin bones and arms, blotches on the head, face and extremities, progressing with frightful rapidity, till at last the palate of the mouth or the bones of the nose fall in, and the victim of this awful disease becomes a horrid object of commiscration till death puts a period to his dreadful suffering, by sending him to that undiscovered country "from whence no travel-ler roturns."

It is a melancholy fact that thousands DIE victims to this terrible disease, through falling into the hands of ignorant or unskilful PRE-TENDERS, who, by the use of that deadly Poison, Mercury, &c., destroy the constitution, and incapable of curing, keep the unhappy sufferer month after month taking their noxious or injurious compounds, and instead of being restored to a renewal of Life, Vigor and Happiness, in despair leave him with ruined Health

to sigh over his galling disappointment. DR. JOHNSTON, OFFICE, No. 7, SOUTH FREDERICK STREET
